

Key features & benefits

- Reliable product thanks to its design and use of high-quality components.
- Multi operation configurable control panel easy to upgrade.
- One main lifting point for fast, easy and safe handling.
- Smarter and safer installation with its vertical power cable outlet through the frame.
- High working temperature tolerance.
- Excellent accessibility and serviceability that allows easy cleaning of the radiator and convenient access to the alternator.
- Spillage-free frame, internal filling inlet and easy, clean drainage of all liquids.
- · Easy, fast and clean coolant refilling.
- Installation-friendly design thanks to its dual-position air outlet.
- Excellent accessibility and superior serviceability. Large removable 45° doors.
- To be used in the most noise-sensitive areas. Different noise-attenuation level enclosures.
- Canopy designed for long-lasting durability in top condition. Durable rustproof canopy, ensuring genset protection.

Options Easy installation External fuel tank connection kit Shock absorber mounts Lifting beam 0 Performance Fuel filter with water separator Automatic fuel filling kit • Coolant heater Earth Leakage Relay 0 Cold-weather kit 0 High-capacity fuel tank 0 Noise attenuation From light to super sound-proof 0 enclosures Silencer noise-attenuation levels for 0 open-skid versions Versatility Remote monitoring and control via Webnet/3G/Ethernet Remote display Digital inputs/outputs expansion modules Different control modules 0 0 GPS system via external module Single-set communications device TCP/ IP (RS485) Maintenance efficiency Battery isolator switch Hot parts protection. 0 Option or as retrofit kit: Option: O
