SPECIAL

## Structure Aluminium Profile 2 Meter

Can be used as a bearing rail for T-profile ceiling. Versatile profile designed to create a modern illumination in many situations. Many applications within recessed, extensions and custom designed solutions.

Designed with wide edge for fastening, bearing and stiffening purposes. Clear or opal cover with a smooth surface

SPECIAL

## Curve Aluminium Profile 2 Meter

Flexible aluminum profile – possibility of bending in two directions. Profile keeps its shape after bending. Minimal bending radius: 50 cm. Possible to use 2 diffusers at the same time. Design special solutions using slings (SELV kit). For LED-strips up to 12 mm width
