

Multilayer composite pipe

(PE-RT / Alu / PE-RT)

What are the advantages of metal composite pipes?

MAINCOR multilayer composite pipes are made of overlapped welded aluminium surrounded by PE-RT layers connected by adhesives. The inner aluminium layer of multilayer composite pipes leads to a higher temperature and pressure resistance in comparison to standard plastic pipes.

Technical properties

Application:

- drinking water installation
- radiator connection
- wall heating
- underfloor cooling
- underfloor heating
- ceiling cooling

Standards:

- DIN EN ISO 21003
- DVGW W542

Approvals:

- SKZ A 462
- DVGW DW8236 BU0016
